Photo Editing

We suggest that you scan all non-digital images at 600 dpi and save as a JPG file.

Crop photos, but still leave some room around subject to allow for motion within slide show presentation

Fix red eye if possible

Color correct old photos as color fades on most old photos

If color is really bad on photo—we suggest you convert it to black & white or sepia tone

If you have us scan and create your slide show, we will do all this for you.
